A note from our Board President

To our Partners,

On behalf of the Board of Directors, and every farmer, educator, and attendee who walks through our doors each year, thank you. Your generosity is woven into everything this conference is. Without partners like you, this gathering simply wouldn't exist, and we never take that for granted.

As you review this year's sponsorship prospectus, you may notice some changes from years past. In today's ever-changing economic landscape, we are taking a thoughtful look at how we structure our conference offerings to ensure the long-term success and financial sustainability of both the conference and our organization. The adjustments reflected in this year's prospectus are part of that effort, and they are designed with our mission's future in mind.

At the same time, we've listened to what matters most to our partners, and this year we've expanded the networking opportunities available to you. Conference setup will begin on Friday afternoon, and we'll kick the weekend off with a welcome reception Friday evening, giving sponsors an early opportunity to connect with attendees in a relaxed setting.

We've also rethought our programming. Rather than hosting a keynote speaker during meals, we're reserving that time for networking at the tables. We warmly encourage sponsors to sit, mingle, and connect directly with attendees over the meal, a chance for real conversation that a keynote address doesn't allow.

We're genuinely excited about these changes, and even more excited about walking into another year of this work with you by our side. Thank you, from all of us, for believing in Virginia's biological farming community and for helping us grow it season after season. We can't wait to see you in 2027.

With heartfelt gratitude,

Kelly Parker,
President, Board of Directors
Virginia Association for Biological Farming
